

Insurance is flat-lining

Twenty years of Lloyd's combined-ratios show the same truth as every major market: insurance hovers at break-even.

Billions spent on process-modernisation and transformation have produced no structural improvement.

The economics won't change until the inputs change.

Digital Signal Intelligence (DSI) is the first methodology that changes the inputs to underwriting, and with it, the economics, delivering a structural **~22% decrease to expense ratios** and **~12% decrease in loss ratios**.
